

Faceting
Gary Statton & Dave Groncki

Good magnification is important for faceting. There are several choices. Students should bring at least one of the following.

Optivisor, preferred by many faceters, with at least a lens plate #5 or #10 at 2.5 or 3.5 power.

Hand held magnifier such as a 10 power doublet Loupe.

All other tools and supplies are provided. Beginning students will first facet rough that we supply. Advanced faceters can bring their own machines.
