

Fusing Workshop Supply and Tool List Fall 2022

In this two-day workshop you will learn to fuse sheet glass and other supplies in a kiln to create a nightlight, small tiles, sun catchers, or pendants. We will cover the basic techniques for cutting sheet glass and preparing patterns for fusing. Some of the fused items may require "cold working" (lapidary work) on the second day.

Please bring:

- safety glasses for protection when cutting glass and cold-working the fused glass
- a full-length fabric or vinyl apron for use while cutting glass and cold-working
- an ultra-fine point Sharpie
- hand or dish towels for cleaning and drying glass
- fine point tweezers, if you already have them

And, please wear closed shoes.

All other necessary tools, equipment, and supplies will be provided. Hardware for the nightlights will be available for sale by the instructor for approximately \$3.25/each.
