

## Who Moved The Hole? - Stone Drilling

### Description

Drilling, stamping, connecting. This class has a little bit of everything. Customize any stone/bead by drilling the hole where you want it. Students will learn the proper use of a flexshaft, drilling techniques, metal stamping and finally we will put it all together with cold connections.

Students are asked to bring the following:

- Flush cutters
- Round nose pliers
- Safety goggles
- Black Sharpee (fine tip)
- Chain nose pliers
- Super grip gloves (optional)
- Magnifying glasses and Ott light as needed
- Metal Stamps (optional)
- Metal ruler
- 1.25mm hand hole punch
- Household hammer
- Divider (optional)

Provided by the instructor:

- Metal Stamps, bezel shears, black max, wood mandrels for forming
- Flex shafts
- Incidental supplies, such as lubricant, drilling boards and dishes.
- Bench block, drilling boards, chasing hammer
- Riveting hammers
- Metal files (not diamond coated)
