

MARBLE WORKSHOP

In this workshop we will make glass marbles out of borosilicate glass.

We will supply all of the glass and any tools you will need including eye protection. In particular, we have the marble molds that you will use. You are, of course, welcome to bring your own eye protection (didymium or stronger) and any tools you like to use.

For safety reasons, **everyone participating in the marble workshop must have a leather apron**. The Harbor Freight website shows a split leather welding apron, item #45193, that is a good low-cost option. When ordering online, be sure to check that the item is in stock. If not in stock online, you can probably find this apron at one of their local stores. There are other sources for similar full-length leather aprons as well, although they tend to be more expensive.
